COLOR CARD

CHOOSE ME

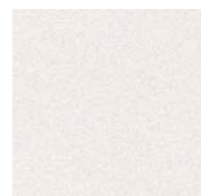

COMPAC has created a wide array of colors and textures capable of satisfying all kinds of practical and decorative requirements.

The references incorporating BIOresins are of special note as they offer all the decorative possibilities of natural stone but are actually even stronger, transformed into a beautifully elegant and homogeneous product with mineral-vein effects that even mother nature finds hard to match.

Solid colors like **Absolute Blanc**, cool appealing colors such as **Passion** and the new **Trend Collection** express new and innovative tones, exponentially increasing their decorative possibilities across the whole array and their combinability with all kinds of furniture, styles, hues and textures, making it a breeze for both private homeowners and professionals such as interior decorators and architects to make the right choice every time.

Natural quartz is a highly resistant mineral of great beauty. It is only surpassed in hardness by diamonds, rubies/sapphires and topaz.

Follow these cleaning and maintenance recommendations for natural quartz to preserve all its lasting decorative qualities.

Cleaning is very simple. Just dampen a microfiber cloth with any pH-neutral soap, clean, rinse with water and dry using a lint-free cloth or paper towel. It is recommended that hot kitchen utensils not be directly placed on these surfaces. Always use a countertop protector pad or similar. Avoid direct impacts and do not cut food directly on these surfaces.

These surfaces are not recommended for use outdoors or under exposure to UV rays.

These surfaces' porosity is inappreciable, meaning they prevent the generation of mold or mildew, the growth of bacteria and are resistant to stains and acids derived from food products. This product is a natural bacteriostatic and contains no chemical antibacterial products. Good maintenance only calls for a simple cleaning of the surface after use.

Our website www.compac.us provides further recommendations for cleaning and maintaining this product, and you can also ask for additional product information at any time.

COMPAC TECHNOLOGICAL QUARTZ is a totally SAFE material, certified by the Greenguard and Greenguard Children's seals, certifying that our products comply with air quality standards covering volatile organic compounds (VOCs). They are also NSF (USA) certified and have a European Contact with Food Certificate, meaning they are safe and hygienic for use in direct contact with food.
